MasterAir MA410M

MasterAir MA410M is our flagship 4 heatpipe cooler that comes with a new thermal detection sensor and specialized Addressable RGB lighting effects. The MasterAir MA410M inherits the excellent cooling performance and reliability from our Hyper series with our Continuous Direct Contact 2.0 technology. The special aluminum fin hexagon cutout gives the cooler an unique Addressable RGB glow that could be controlled through our controller that is provided. The thermal detection sensor will monitor the CPU temperature and display the change in temperature through color lighting. MA410M also comes with Dual MF120R fans that provides a push and pull configuration to maximize CPU cooling.

Features

Hexagon Hologram Aluminum Fin– Specialized hologram cutout for unique color lighting and excellent heat dissipation

Thermal Detection Sensor– CPU temperature monitored by sensor and displayed through color lighting effects

Air-Guide Armor– The specially designed armor to guide the air flow and reduce dead spots.

28 Addressable RGB LED– Fully Addressable RGB that is certified to sync with RGB Motherboard or controlled by MasterPlus+

Continuous Direct Contact Technology 2.0 (CDC 2.0) - By compressing heatpipes together, there is 45% more surface area on the cooler base, providing improved heat dissipation over the previous version ,CDC 1.0
