- **CyberLink PowerDirector 5**

CyberLink PowerDirector5 is the total solution video editing software that enables you to unleash your movie making creativity for pro users and for authoring and burning your videos and photos on CD or DVD for entry level. They offer a wide variety of features to help you produce your own VCD/DVD movies and view them on the TV/PC or share with friends and family.

- **CyberLink PowerProducer 4**

A powerful tool to have under the belt for producing a master piece! This software captures the source from a wide range of mediums: TV, DVD, camcorder...etc. Each capture is turned into different chapters, which could be rearranged later. Similar to the PowerDirector, the captures can be edited using tools to enhance the visual picture. The revised final product can then be converted into a wide range of formats such as regular or wide screen, DVD...etc.
