

## Less is More

Add wireless capability to your wired network and enjoy the convenience that comes when you eliminate cables. Add wireless devices to your network. With less wiring, you'll do much more.

### Wireless Convenience

You've got the network — now enhance it with Wireless-G access up to 54 Mbps. Now it's easy to grow your network by adding computers, printers and other wireless devices, without stringing cables. Also compatible with Wireless-B devices. Reliable connectivity allows you to move your laptops, or set up your devices all around your home or office. Or add Access Points to two separate networks and create "cable-less cable" connectivity between them.

### Easy Configuration

Push-button setup makes it simple to add devices to your new wireless network. Push the button on the Access Point and on any SecureEasySetup-enabled device to automatically create the wireless connection. Device and security configuration is a snap with the Browser-based configuration utility.

### Complete Security

Work with confidence. Industrial-strength encryption helps keep your communications protected and private. Access filter lets you control who can get on your wireless network.

The maximum performance for wireless is derived from IEEE Standard 802.11 specifications. Actual performance can vary, including lower wireless network capacity, data throughput rate, range and coverage. Performance depends on many factors, conditions and variables, including distance from the access point, volume of network traffic, building materials and construction, operating system used, mix of wireless products used, interference and other adverse conditions.
