

XFx Part Numbers:

HD-485X-ZDF(\*)

HD-485X-YDD(\*)

HD-485X-YDF(\*)

# Radeon™ HD 4850

UP TO 1GB [256-bit] DDR3 Graphics Card

Bus  
PCI-E 2.0  
Profile  
Double  
Output  
Dual DVI

## PLAY THE POWER CARD.

Featuring a full TeraFLOP of compute power, the XFX Radeon HD 4850 is true power player. Supporting ATI CrossfireX technology for superior scalability and system performance. Play the most intense games with a graphics card that knows how to conserve energy while delivering optimum performance.

- TeraScale Graphics Engine
- Unified Superscalar Shader Architecture
- DDR3 Memory
- Accelerated Video Transcoding (AVT)
- Dynamic Power Management
- 800 Stream Processing Units
- ATI PowerPlay™ Technology
- ATI CrossFireX
- DirectX 10.1 Support
- HDCP Capable

# Radeon™ HD 4850

UP TO 1GB [256-bit] DDR3 Graphics Card

## TeraScale Graphics Engine

The new TeraScale graphics engine features up to 1.2 teraFLOPS, nearly one billion transistors and up to 800 stream processors so you can enjoy the high resolutions and fast frame rates previously only available with dual-card systems.

## ATI CrossFire™

The ultimate multi-graphics card performance gaming platform. Enabling game-dominating power, ATI CrossFire technology enables two or more discrete graphics cards to work together to improve system performance. For The Ultimate Visual Experience™, be sure to select ATI CrossFire ready motherboards for AMD and Intel® processors and multiple ATI Radeon™ HD graphics cards. ATI CrossFire technology allows you to expand your system's graphics capabilities. It allows you the ability to scale your system's graphics horsepower as you need it, supporting up to four ATI Radeon™ HD graphics cards, making this the most scalable gaming platform ever.

## ATI PowerPlay™ Technology

Designed to enable power saving profiles that help reduce power consumption when the graphics card is idle or in minimal use. This dynamic power management enables the graphics card to automatically adjust power between low, medium and high states for a tremendous power efficiency advantage. For example, when receiving and composing emails little demand is on the graphics card and it runs in a low state, whereas when gaming, there is high demand on the graphics engine and the graphics card runs in a high state. Since the graphics card consumes less power it also produces less heat ultimately contributing to reduced system temperatures and fan noise delivering consistent performance levels for a seamless user experience.

## ATI Stream Technology

A set of advanced hardware and software technologies that enable ATI graphics cards, working with the system's CPU to accelerate many applications beyond just graphics. This enables better balanced platforms capable of running demanding computing tasks faster than ever.

## Dual Dual-Link Technology

Supporting digital output up to 2560x1600 on two LCD Monitors at the same time.

## HDTV Ready and HD Gaming

Supporting digital output up to 2560x1600 on two LCD Monitors at the same time.

### XFX Products Chart for this Chipset\*\*\*

Model Number	Packing	Version	Engine		Memory			Stream	Cooling	Output	Profile	CrossFireX	Max Res.	Card Dimension
